TRANSMITTAL OF FINAL FEASIBILITY STUDY TECHNICAL MEMORANDUM 1, OPERABLE UNIT SIX (OU6) - ECM-027-95

Action: Forward the Feasibility Study Technical Memorandum 1 to EPA and CDPHE

Enclosed please find eight copies of the final Feasibility Study Technical Memorandum (TM) No. 1 for Operable Unit 6 dated May 1995. This version incorporates DOE comments on the draft of this document dated April 1995.

As we have discussed at recent EPA/CDPHE meetings, some information upon which TM 1 is based is subject to change. Information that is likely to change includes the exposure factors used in calculating open space/recreational preliminary remediation goals and radionuclide slope factors used in the effective dose conversion calculations. In addition, the Remedial Investigation team is currently revising the Chemical of Concern list upon which TM 1 is based. EG&G will incorporate such changes into the feasibility study, as work progresses. However, the enclosed final TM 1 will not be revised. Instead, any changes will be documented in the feasibility study report.

A meeting will be scheduled with the regulatory agencies in approximately two to three weeks so that the feasibility study team can present an overview of the feasibility study TM 1 to the agencies. If you have any questions or comments regarding this TM, feel free to contact Robert Cygnarowicz at 966-8601 (DP x7477).
